We find and revitalise, commercial properties up to the possible/rent or/buy. One main focus of our successful work is economically orientated analysis in order to increase the strategic image, profitability and efficiency of the asset.

With the success we work over 25 years, especially in rapidly developing areas of the main cities in Germany for the leading companies. Due to our long term activities of many years in the commercial market, we have an extensive network of local contacts and due to that, we are involved in the urban development.

You look for interesting space/properties, for tenants or buyers! That is exactly what we offer with the adequate solution and the right contact partner.

If you wish, we are happy to give additional advice on the basis of an all-inclusive fee. We do not charge fees before the signing of an agreement.

Become convinced, just call us, write us an e-mail or just send us the data of your request. We look forward to your message!
